28, March2011,

Dear Sir/Madam.

This is to inform you that I have submitted a journal paper for your review. I am writing this cover letter to state that I hereby declare that this manuscript has not been published in any other journal or been used in any conference proceeding for that manner.

This journal entitled **Performance of Wind Turbine Based on Wind Speed Data and Turbine Tower Height in Kangar, Northern Malaysia**. The work can benefit to give an important information to choose a suitable wind turbine in Kangar, Northern Malaysia.

I would like to thank you for your support and time allocation in reviewing my research findings; it is highly appreciated. I will like to send more of my research findings in years to come.

Thank you;

Yours sincerely;
MUHAMMAD IRWANTO

Dear Managing Editor

Manuscript No. 5107-AJBAS Name: Muhammad Irwanto

Manuscript Title: Performace of Wind Turbine Based on Wind Speed Data and Turbine Tower Height in Kangar, Northern Malaysia

Thanks for your arrange of this paper content There are two correction have to be done:

1. These sentences below in one paragraph in page 5, it is typed twice. **Please remove one of them.**

The effect of wind speed on the performance of wind turbine is observed during four days (11 March to 15th march 2011). The wind turbine voltage is measured and logged by electrocorder every minute as shown in Fig. 8. This observation data condition is divided by two parts, the first is during the day time and the second is during the night time. Based on Fig. 3 and Fig. 8, the wind speed and the wind turbine voltage are higher during the day time rather than during the night time. On the 11 March 2010, the average wind turbine voltage is 7.1 V during the day time and 1.3 V during the night time. On the 12 March to 15th March 2010, the wind speed gives a big energy potential to generate the wind turbine, therefore the average wind turbine voltage 31 V during the day time and 20.3 V during the night time.

2. **Please put Fig. 8: wind turbine voltage before Conclusion.**

Thank you for your attention.

Best regard

Muhammad Irwanto
